Letter of Support for Cordova Covered Spaces Project

To Whom to May Concern:

The City of Cordova Parks & Recreation Commission is pleased to support the overall goals and objectives of the Cordova Covered Spaces Project to create covered shelters in and around Cordova.

As trustees for the care and planning of recreational resources within our city, we fully appreciate the importance of the work in developing a network of covered spaces in our city.

The efforts to identify potential sites for covered spaces used by Cordova residents and visitors aligns well with the City of Cordova's Comprehensive Plan. It would hopefully evolve into a network of covered spaces which can be developed to create links between them to further expand their use.

Please be assured that the Parks and Recreation Commission fully supports this new initiative and stands ready to assist wherever possible in its development. Given the limited resources available to us, we are grateful for volunteer work to help us develop wonderful recreational opportunities here in Cordova.

Sincerely,

Wendy Ranney, Chair

On behalf of the City of Cordova Parks and Recreation Commission.
